Continental cane mills (direct-consumption sugar)	<u>74,854</u>	<u>96,478</u>	<u>96,872</u>	<u>141,461</u>	<u>91,839</u>
Total	5,674,759	8,139,795	7,068,880	6,999,579	6,708,727
Exports <sup>1/</sup>	<u>208,555</u>	<u>47,461</u> <sup>2/</sup>	<u>178,264</u>	<u>132,061</u>	<u>65,474</u>
Distribution for consumption in U. S.	5,466,204		6,890,616	6,867,518	6,643,253

<sup>1/</sup> Actual exports for 1938-40 and first 9 months of 1941 (data for October-December 1941 not available); for 1942, deliveries for export by primary distributors which are much larger than actual exports.

<sup>2/</sup> First 9 months of 1941.

In the above table, the deliveries of refined sugar have been converted to short tons, raw value, by applying the factor 1.07, except in the case of cane sugar refiners. Deliveries of refined sugar by refiners are converted to raw value by using the factor 1.063829 for 1942; 1.063030 for 1941; 1.061725 for 1940; 1.060259 for 1939; and 1.059 for 1938. These factors represent the relationship between meltings of raw sugar and production of refined sugar during the two year periods 1940-41, 1939-40, 1938-39, 1937-38, and 1936-37, respectively.

Deliveries of sugar for local consumption in the Territory of Hawaii during the calendar year 1942 amounted to 47,404 short tons, raw value, as compared with 36,618 tons in 1941, 32,965 tons in 1940, 30,842 tons in 1939, and 27,476 tons in 1938. In Puerto Rico, 1942 deliveries totaled 84,554 short tons, raw value, as compared with 78,027 tons in 1941, 68,706 tons in 1940, 69,037 tons in 1939 and 69,086 tons in 1938.

Stocks of sugar in the hands of refiners, beet sugar factories, and importers of direct-consumption sugar on December 31, 1942, are shown in the following table together with the corresponding figures for the previous four years:
